"Respected Judges, greetings from Team 818_CAFFEINE CREW! (0:00 - 0:08)

We are presenting Problem Statement ID 26121 for Oil India Limited — eRTMAC-NWIS. (0:08 - 0:15)

During drilling operations, rig costs exceed \$50,000 per day. Yet, 40 years of critical offset well knowledge — mud losses, kicks, and stuck pipe incidents — remain locked inside thousands of PDF reports. (0:15 - 0:30)

To solve this, we built ५-DRISHTI — Insights Beneath The Surface. (0:30 - 0:35)

Our platform combines PostGIS geospatial map search, NLP document extraction, and an ensemble ML risk engine that forecasts downhole hazards across 50-meter depth intervals while surfacing past engineering playbooks. (0:35 - 0:48)

During live operations, it ingests 1-Hertz eRTMAC WITSML telemetry to trigger instant anomaly alerts, while our zero-hallucination RAG Assistant provides instant answers with page citations. (0:48 - 0:56)

५-DRISHTI delivers safer wells, zero NPT, and institutional memory for Oil India Limited. Thank you!" (0:56 - 1:00)
